# Instructions: Compare School Spending and Student Characteristics

- Follow these instructions to use the scatterplot feature to compare school spending with student characteristics.

- First, decide whether you would like to compare school or district level spending by clicking on the appropriate button in the menu.

- These buttons will each expand to show the years of data that are available.

- Click the year you are interested in analyzing.

- You can also click the **Back** button to return to the main menu.

You can change the X and Y axis of the display by selecting variables from the dropdown menu.

Interested in a specific school or district? Type the name here to highlight that data point.
